MEDICAL SCHOOL

LISBOA

PhD in Medical Sciences

The Católica Medical School PhD in Medical Sciences is a collaborative effort with the **Faculty of Dental Medicine** and the **Faculty of Health Sciences and Nursing** of Universidade Católica Portuguesa. Our PhD students have a wide variety of training options and can develop their research in various areas of Medical Sciences. The programme is supported by sustained **biomedical research** and **diversified training methodologies**, ensuring a well-rounded and **adaptable academic experience**.

Our two research centres, **CIIS** (which promotes clinical and translational research) and **CBR** (which promotes basic biomedical research), along with **Hospital da Luz**, the **teaching hospital** for Católica Medical School, enhance **teaching, clinical, and research activities**. We value **customised paths** for each doctoral student, matching their **academic and professional profile**. Therefore, we offer a wide range of **specific training options** such as laboratory or professional internships, workshops, advanced courses, rotations, external courses, scientific publications, and communications, as well as teaching activities.
