**PUBLIC NOTICE FOR AN INTERNATIONAL CALL FOR APPLICATIONS
FOR THE POST OF APPLIED RESEARCH ASSISTANT**

Internal Reference: CBR-2025-05

1. Framework

The Rector of Universidade Católica Portuguesa, Prof. Dr. Isabel Capelo Gil, hereby announces the opening of an international call for applications for one vacancy of applied research assistant to perform duties of development (with an exclusivity clause), in the scientific field of Cell Biology. The research activities will be carried out at the Católica Biomedical Research Centre (CBR), integrated at the Católica Medical School of Universidade Católica Portuguesa, in Lisboa - Oeiras, within the framework of the project reference 2023.12420.PEX, titled "CancerUnsilence - Exploring the hypersensitivity of cancer cells to perturbation in mitotic transcriptional silencing", funded exclusively by national funds through Fundação para a Ciência e a Tecnologia, I.P.

CancerUnsilence aims to investigate the hypersensitivity of cancer cells to perturbation in mitotic transcriptional silencing. Our preliminary results revealed that depletion of TTF2 in cancer cells leads to retention of nascent transcripts on mitotic chromatin and increased frequency of mitotic defects. Importantly, the same perturbation does not cause similar defects in non-cancer cells. We will thus: test whether hypersensitivity to TTF2 depletion is a universal feature of cancer cells (Aim 1), test two mechanisms that may render these cells more dependent on this pathway (Aim 2) and investigate how this can be exploited to promote selective death of cancer cells (Aim 3). Particularly, the successful candidate will test the effect of mitotic silencing disruption in a panel of cancer and non-cancer cell lines (Aim 1) and test two mechanisms that may render these cells more dependent on this pathway (Aim 2). The selected candidate will apply methods of cellular and molecular biology, microscopy and imaging analysis.
